Defect Type

Stained

Sound

Defective (Stained)

Description

Defective seed – (An overall Description):

Any damage to the seed coat or kernel that results in changes from the predominating class (determined by the photographic charts).

Staining:

Any coating of vegetable gum that reduces the lustre or provides a contact adhesion for plant material to the seed coat. Discolouration of the white hilum, speckling of vegetable matter and a fresh 'grass like smell' are indications of staining. Tested on sample as presented.
